Arabic: Fluent

English: Fluent (IELTS 8.5)

• PROFILE

As a seasoned Operations Manager with over 6 years of diverse experience, I have developed valuable skills in planning and executing complex operations. Nevertheless, my expertise extends beyond logistics & operations as I have a keen interest in full-stack web development. Pursuing a career that combines both not only aligns with my long-term career goals but also offers continuous learning opportunities and exciting challenges that I find enjoyable.

• WORK EXPERIENCE

Operations Manager - Riyadh

Kwick-Box | Jun 2018 - Sep 2020

Operations Supervisor - Riyadh

LogicMena | Aug 2015 - May 2018

• PROJECTS

1- Reddit Clone

Built a Reddit-inspired web application using the MERN stack. The backend was implemented using Node.js and Express, with MongoDB serving as the database. On the frontend, I utilized React and react bootstrap for a responsive UI.

2- Movies Directory

Built a movie directory using JavaScript, CSS, and HTML, which utilizes an external API to fetch data on movies. The HTML and CSS were used to create the user interface, while JavaScript was responsible for handling the API requests and displaying the data in the appropriate sections.
